This is helpful Meghan - I'll let Melanie know generally what we're thinking about per your note below.

Not really sure what this "response from the federal office that gave Region 1 staff reason to believe that the PFAS issue may soon be handled in a more coordinated manner" is in reference to.

As you know letters going out next week outlining an engagement strategy as I have been told.

As to written material to share, I don't think we have anything on the regional level and the Cross Agency PFAS Committee Action Plan is in the Administrator's office pending review/release.

Both the Action Plan and your memo to The Administrator highlight the following items which will be worked on:

Development of toxicity values

Analytical method development

Communication

Exposure reduction (Action Plan but not R1 memo)

Hope this helps.

Thanks.

The memo to Administrator Pruitt was internal – but I can send her info on our more coordinated approach to PFAS. I understand letters are going to 50 Governors next week at ECOS?

Alex,

Do you have anything you can share in regards to the email below?

Thanks,
Melanie

Subject: Region 1 Memo RE: PFAS

Hi Melanie,
During a brief conversation I recently had with our new Region 1 Administrator, Alex mentioned a memo she recently sent to Administrator Pruitt which outlined five PFAS related challenges facing state agencies. As I understand it, there was a response from the federal office that gave Region 1 staff reason to believe that the PFAS issue may soon be handled in a more coordinated manner.
Have you seen this memo or have information about the five items discussed? It sounds like its contents could help inform our agency's efforts.

Thanks,
Kerri
